

- January 30, 2004.
- 3. The residual value plotted is the difference between simulated and measured values. Positive residuals indicate model overestimation while negative residuals indicate model underestimation.

Residual in feet 1.0 - 1.5 ft 1 - 1.5 ft 0.5 - 1 ft 0.5 - 1.0 ft up to 0.5 ft up to 0.5 ft
